We at SARTEN

Aim to achieve the highest level of customer satisfaction. We prioritize quality, efficiency, and environmentalism in the packages we produce, and we desire to mirror these principles in our relationship with our customers and employees. We make sure that the legal requirements, standards, and compliance obligations regarding quality and environment are fulfilled. We care about gaining customers' trust and preference. We think that ensuring quality is everyone's responsibility at Sarten. With the belief that qualified people manufacture quality products, we prioritize education as one of our main objectives.

A standard setter with our products and services, we use our role as the leading and pioneering company in the sector to provide the highest benefit to our customers in offering their products to the market in a competitive, healthy, and reliable manner. In doing so, we strive for a better, safer common future by reducing our costs, making sure our growth is sustainable, and analyzing our processes, risks, and opportunities.

We are committed to preventing pollution by minimizing the environmental impact arising from our activities, protecting the environment, keeping the use of natural resources at an optimum level, increasing recycling and recovery, and preventing occupational accidents by upholding occupational safety conditions.

We prefer to use environmentally friendly technologies that increase energy efficiency in all our processes. We conduct waste management with a zero-waste approach and aspire to contribute to raising awareness of our employees, suppliers, customers, and society about environmental impact and climate change to provide a clean and healthy environment for future generations.

In line with our vision, we focus on creating and managing exemplary competitive processes by adopting a total quality management approach and encouraging team spirit. For a result-oriented, value-creating company with high social responsibility, brand value, and environmental awareness, our priority is to effectively conduct activities, fulfill applicable requirements, and establish systems for the continuous improvement of our processes.
